DISPOSAL PROGRAM 8

January 12, 1954

MEMORANDUM TO: Mr. Pettibone, Chairman  
Rubber Producing Facilities  
Disposal Commission

Re: RuR SR 418  
Dow Chemical Company  
Torrance, California

This is to advise that I have authorized the Manager of the Los Angeles Loan Agency to sell to the Dominguez Estate Company two parcels of land containing 1.04 and 0.84 acres, respectively, and to give to the Los Angeles Flood Control District a quitclaim deed for 1.90 acres of land, for the purpose of re-aligning the Dominguez channel.

These parcels are approximately one mile from the plant sites and were acquired when we purchased property on which to construct an effluent plant, from which the effluent is discharged into the Dominguez channel.

This channel serves the Dow Chemical Plant, Midland Rubber Plant and the Shell Chemical Plant and will not interfere with the production of any of these plants.

E. D. KELLY, Director  
Office of Synthetic Rubber

*I think this is no concern of ours unless the plots are included in the description of the property as given in the bookkeeping.*
